## Objective

---

I am a front end web developer with 5+ years of experience in professional Node.js application development. Expert in styling and scripting, I have applied my skills to all stages of feature development, from requirement gathering to sign-off and deployment. I believe in lively collaboration, high-performance scripting practices, rigorous testing standards, and development environments that encourage all of the above. I'd like to offer my skills to help you build something interesting.

## Skills

---

Expert in front end web development: [HTML](#), [CSS](#), [JS](#), [Node.js](#), [React](#).

## Experience

---

### The Wall Street Journal

*Senior Developer, May 2012 - present*

Full stack development for [WSJ.com](http://WSJ.com) products. Working in Agile teams using current technologies such as Git, Node.js, React, and SCSS. Responsibilities include client- and server-side development, product conception, maintenance of application architecture, migration of legacy products to latest technologies, and cross-department communication. Key projects include:

- ongoing implementation of front end advertisement technology
- redesign of the navigation bar, 2017
- redesign of the home page, 2015
- redesign of the article template, 2014

### Anthology Film Archives

*Designer, May - Aug 2012*

Designed posters, flyers, and pamphlets for the Summer 2012 season of the [Anthology Film Archives](#), an independent cinema house, for individual screenings as well as film series. Tasked with the typesetting and composition of the Fall 2012 calendar.

## Education

---

### Cooper Union

*School of Fine Arts, BFA, May 2012*

Studied in graphic design, sculpture, drawing and performance.
