Objective

I am a front end web developer with 5+ years of experience in professional Node.js application development. Expert in styling and scripting, I have applied my skills to all stages of feature development, from requirement gathering to sign-off and deployment. I believe in lively collaboration, high-performance scripting practices, rigorous testing standards, and development environments that encourage all of the above. I'd like to offer my skills to help you build something interesting.

Skills

Expert in front end web development: [HTML, CSS, JS, Node.js, React.](#)

Experience

The Wall Street Journal

Senior Developer, May 2012 - present

Full stack development for [WSJ.com](#) products. Working in Agile teams using current technologies such as Git, Node.js, React, and SCSS. Responsibilities include client- and server-side development, product conception, maintenance of application architecture, migration of legacy products to latest technologies, and cross-department communication. Key projects include:

- ongoing implementation of front end advertisement technology
- redesign of the navigation bar, 2017
- redesign of the home page, 2015
- redesign of the article template, 2014

Anthology Film Archives

Designer, May - Aug 2012

Designed posters, flyers, and pamphlets for the Summer 2012 season of the [Anthology Film Archives](#), an independent cinema house, for individual screenings as well as film series. Tasked with the typesetting and composition of the Fall 2012 calendar.

Education

Cooper Union

School of Fine Arts, BFA, May 2012

Studied in graphic design, sculpture, drawing and performance.
